EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

the claims were numbered incorrectly, omitting claim 6, thus the claims have been renumbered with 7-17 now being 6-16.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

none of the prior art of record discloses or suggests a medical apparatus and its method of use in the gastro-intestinal tract, comprising in part the combination of the following:

an outer surface having a side opening for receiving tissue therethrough;

a cutter adapted to receive RF energy for cutting tissue, the cutter supported inward of the side opening and adapted to transverse a length of the side opening for cutting tissue extending therein; and

a tissue stop disposed inward of the cutter, wherein the tissue stop comprises a pole of an RF circuit.

Houser (6,872,204) discloses a tissue cutting catheter and RF cutting method that was identified as the closes prior art, but lacks the disclosure of a tissue stop that comprises a pole of an RF circuit. Rather the cutter is a wire (80) connected to a RF circuit and the tissue stop (lower wall of lumen 66) is not electrically connected to the cutter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Adams (6,632,227) discloses an endoscopic resection device, but lacks the disclosure of the tissue stop (Figure 4a) comprising a pole of an RF circuit.
